Self-Made Assignment - C Language Basics

Introductin to C lang

True/False Question

1. Dennis Ritchie is credited with the development of the C programming language.
2. The C language was influenced by the B programming language.
3. The `main` function is optional in a C program.
4. The semicolon (;) is used to terminate statements in C.
5. The `scanf` function is used to take input from the user.
6. The `#include <stdio.h>` directive is used to include the Standard Input Output header file in a C program.
7. C is a case-insensitive language, so `Variable` and `variable` are considered the same identifier.
8. In C, the `return 0;` statement at the end of the `main` function signifies successful execution of the program.
