

**Course****&****Test Series****Self-Made Assignment - HTML Advanced****Creating Lists**

Write two HTML codes for the following two boxes using ordered list.

## Current Affairs and Computer

1. The latest international climate agreement aims to significantly reduce carbon emissions by 2030 to combat global warming.
2. Recent geopolitical tensions have highlighted the need for increased cybersecurity measures to protect sensitive national data.
3. Advancements in artificial intelligence are leading to the development of more sophisticated machine learning models that can perform complex tasks.
4. The growing trend of remote work has accelerated the adoption of cloud-based collaboration tools for businesses worldwide.
5. Legislation is being proposed in several countries to regulate the ethical use of AI and ensure transparency in algorithmic decision-making.

## Important Programming Languages in Computer Science

1. **Python:** Python is known for its simplicity and readability, making it a popular choice for beginners and professionals alike in fields ranging from web development to data analysis.
2. **JavaScript:** JavaScript is essential for web development, enabling interactive web pages and is widely used in front-end development alongside HTML and CSS.
3. **Java:** Java is a versatile, object-oriented language often used in enterprise environments, Android app development, and large-scale systems due to its portability and robust security features.
4. **C++:** C++ provides fine control over system resources and memory management, making it ideal for developing high-performance applications, including games and real-time systems.
