Self-Made Assignment - HTML Basics

Heading Tags and Paragraph

Write HTML code for the following box using various heading tag and paragraph tag.

Introduction to HTML H1

HTML stands for HyperText Markup Language. It is the standard language for creating web pages.

Basic Structure H2

The basic structure of an HTML document includes a doctype declaration, an HTML element, a head, and a body.

Doctype Declaration H3

The doctype declaration defines the version of HTML used and helps browsers to render the page correctly.

HTML Elements H2

HTML elements are the building blocks of HTML pages. They consist of tags and their content.

Tags H3

Tags are used to create HTML elements. Tags are enclosed in angle brackets.

Opening and Closing Tags H3

Most HTML elements have opening and closing tags. For example, `<p>` and `</p>` for paragraphs.

Attributes H3

Attributes provide additional information about HTML elements and are included in the opening tag.
