Self-Made Assignment - Java Script

Variables , Data Types and Operators in Java Script

Run this programs using Logical Operators in Java Script.

1. Write a program to check whether a number is either positive or even. If the number is positive OR even, print "Valid", otherwise print "Invalid".
2. Write a program to check if a user is an adult, a teenager, or a child based on their age. You should categorize as follows:
 - 1.A user is a "Child" if their age is less than 13.
 - 2.A user is a "Teenager" if their age is between 13 and 19.
 - 3.A user is an "Adult" if their age is 20 or above.
