Self-Made Assignment - Java Script

Conditional Statements in Javascript

1. Write a JavaScript Code that checks a student's grade and displays a message based on the grade. If the grade is 90 or above, the message should be "Excellent". If the grade is between 70 and 89, the message should be "Good". If the grade is between 50 and 69, the message should be "Average". If the grade is below 50, the message should be "Fail".

2. Write a JavaScript Code that checks if a number is divisible by both 3 and 5.
