Self-Made Assignment - C Language

Union in C Language

1. Write a C program to define a union with the following data members: `int id`, `float salary`, and `char name[20]`. Write a program to demonstrate how the union works by assigning values to each member of the union and printing them.

2. Write a C program to demonstrate the use of a union. Define a union that can store different types of data such as `int`, `float`, and `char`. Write a program to assign values to different members of the union, print them, and explain how memory is shared between the members.
