Self-Made Assignment - MS Excel

Use of Round, Round Up and Round Down Function

Given the following sales data in an Excel sheet:

Product	Sales Amount
Product A	123.456
Product B	78.999
Product C	234.789

1.ROUND Function

Given the number 56.789, round it to 1 decimal place using the ROUND function. What is the result?

2.ROUNDUP Function

A student scores 82.345 marks in a test. Use the ROUNDUP function to round the score to the nearest whole number. What is the rounded score?

3.ROUNDDOWN Function

A temperature reading is 38.987°C. Use the ROUNDDOWN function to round the temperature to 2 decimal places. What is the result?

4.Combination of Functions

You have a product price of 199.876. Using Excel:

Round it to 2 decimal places using the ROUND function.

Round it up to the nearest integer using the ROUNDUP function.

Round it down to 1 decimal place using the ROUNDDOWN function. What are the results for each operation?
