Self-Made Assignment - MS Excel

Use of Round Up and Round Down Function

Stock Price Adjustments

A stock broker needs to round stock prices to the nearest whole number. The following stock prices are given:

Stock Symbol	Price (\$) ROUNDUP	Price (\$) ROUND DOWN
AAPL	148.567	148.567
TSLA	245.789	245.789
AMZN	3180.241	3180.241
MSFT	249.189	249.189
GOOG	2735.748	2735.748

Use the ROUNDUP, ROUND DOWN function to round each stock price to the nearest whole number.

Question: What are the new stock prices after rounding up?

 CBSE
