Self-Made Assignment - [MS Excel]

Using Find and Replace in Large Dataset in MS Excel

Using Find and Replace in MS Excel

The dataset contains errors and inconsistent values that need to be corrected using the **Find and Replace** feature.

| Order ID | Customer Name | Product Code | Region | Sales (\$) | Replace Product Code | Replace Sales Value |
|----------|----------------|--------------|--------|------------|----------------------|---------------------|
| 1001 | John Deo | P-101 | North | 500 | | |
| 1002 | Sarah Johnson | P101 | South | 600 | | |
| 1003 | Mike Brown | P-101 | East | 700 | | |
| 1004 | Alice Smith | P-103 | North | 400 | | |
| 1005 | David Lee | P-104 | South | 800 | | |
| 1006 | Emily Davis | P-102 | West | 900 | | |
| 1007 | James Wilson | P-103 | North | 300 | | |
| 1008 | Emma Watson | P104 | South | 1000 | | |
| 1009 | Michael Carter | P-101 | East | 450 | | |
| 1010 | Olivia Brown | P-103 | West | 750 | | |

Find and Replace Formatting

1. **Correct Product Codes:**
 - Replace all occurrences of **P101** with **P-101**.
 - Replace all occurrences of **P104** with **P-104**.
2. **Standardize Sales Values:**
 - Replace all occurrences of **500** with **550**.
 - Replace all occurrences of **600** with **650**.
