Self-Made Assignment -Introduction to C Plus Plus

Operators and Manipulators in C Plus Plus

Write a program in C++ that demonstrates the use of the setw manipulator to format the output. The program should:

1. Take 5 integers as input from the user.
2. Display these integers in a formatted table where the numbers are aligned in columns.
3. Ensure that each number occupies a field of 10 characters using setw(10).
4. Include column headers and use setw to align the headers properly.

Sample Input:

Enter five integers: 123 456 789 1011 1213

Sample Output:

Number 1 Number 2 Number 3 Number 4  
Number 5 123 456 789 1011 1213
