Self-Made Assignment -Introduction to C Plus Plus

Data Types And Variables in C++

Write a C++ program to calculate the grades of students using their marks in five subjects. Use appropriate data types for each variable and ensure that your program:

- Accepts the name, roll number, and marks for five subjects as inputs.
- Calculates the total marks and average marks.
- Classifies the student into grades (A, B, C, D, or F) based on the average marks.
- Outputs the student's name, roll number, total marks, average, and grade.
