Self-Made Assignment - Java Script

Script Tag

1. Write a Java Script code to print "Today, I'll be talking about JavaScript, one of the most widely used programming languages in web development." By using inline JavaScript.

2. Write a Java Script code to print "JavaScript is a dynamic, client-side scripting language that makes web pages interactive, allowing developers to create engaging, real-time, and user-responsive experiences directly in the browser." By using inline JavaScript.
