Self-Made Assignment - Java Script

Enabling Java Script in Browsers

Question 1 : Rearrange these steps in Correct Order.

- Click OK and come out.
- Select Security tab from the dialog box.
- Follow Tools - Internet Options from the menu.
- Scroll down till you find the Scripting option.
- Select Enable radio button under Active scripting.
- Finally, click the Custom Level button.
- To disable JavaScript support, select the Disable radio button under Active scripting.

Question 2: Rearrange these steps in Correct Order.

- In the search bar, type JavaScript. Enabled.
- Then you will find the warning dialog. Select "I'll be careful, I promise!"
- Open a new tab and type about:config in the address bar.
- There you will find the option to enable or disable JavaScript by right-clicking on the value of that option -> select toggle.
- Then you will find the list of configure options in the browser.
