Self-Made Assignment - MS Power Point

Printing Handouts and Slides in Power Point

Make power point presentation and also make handouts of your presentation.

Slide 1: Title Slide

Title: The Basics of Renewable Energy

Subtitle: Exploring Sustainable Energy Sources for a Greener Future

Slide 2: Introduction

Heading: What is Renewable Energy?

Content:

- Energy from natural sources that are replenished naturally
- Examples: Sunlight, wind, rain, tides, and geothermal heat

Slide 3: Types of Renewable Energy

Heading: Major Types

Content:

- Solar Energy
- Wind Energy
- Hydropower
- Geothermal Energy
- Biomass Energy

Slide 4: Benefits of Renewable Energy

Heading: Why Choose Renewable Energy?

Content:

- Reduces greenhouse gas emissions
- Sustainable and inexhaustible
- Low operational costs after setup

Slide 5: Challenges

Heading: Barriers to Adoption

Content:

- High initial costs
- Weather dependency
- Energy storage limitations

Slide 6: Conclusion

Heading: The Way Forward

Content:

- Transitioning to renewables is essential for combating climate change
- Governments and individuals play a key role
- Investing in research and technology is crucial
