Self-Made Assignment - MS Word

Inserting Clipart in MS Word

Space Exploration:

Space exploration has always fascinated humankind. Scientists and astronauts work tirelessly to understand the mysteries of the universe. Over the years, many space missions have been conducted, leading to discoveries of new planets and galaxies. Satellites help us in communication, weather forecasting, and GPS navigation. The moon landing in 1969 was one of the biggest achievements in history. Space agencies like NASA and ISRO continue to explore Mars and other celestial bodies. The idea of humans settling on Mars is becoming more realistic with technological advancements. Space telescopes provide stunning images of distant stars and galaxies. Understanding space also helps us learn more about Earth and its place in the cosmos. The future of space exploration holds endless possibilities for discoveries and innovation.

(insert different clipart images of a spaceship, astronaut, or planets to match the topic.)

Tasks:

Apply Picture Styles – Use the **Picture Format** tab to add effects like shadows, reflections, or borders.

Change Image Shape – Use the **Crop to Shape** option to change the image shape (e.g., circle or star).
