Self-Made Assignment - C Language

Elements of C Programming

A school wants a simple program to display a student's basic profile using the C language.

Write a program that:

1. Declares and initializes the following variables:
 - Roll number (as an int)
 - Average marks (as a float)
 - Grade (as a char)
2. Prints the student's details in a clear and formatted manner.

Resultant Output:

Output

```
Roll Number : 101  
Average Marks : 87.50  
Grade : A
```
