Self-Made Assignment - C Language

Operators in C Language

Task:

You are asked to create a program that calculates the **total** and **average** marks of a student in 3 subjects – **Math, Science, and English**.

Requirements:

1. Ask the user to **enter marks out of 100** for the 3 subjects.
2. Use **arithmetic operators** to calculate:
 - o Total marks
 - o Average marks
3. Display:
 1. The total marks
 2. The average

Output Screen:

Output

```
Enter marks for Math (out of 100): 60
Enter marks for Science (out of 100): 76
Enter marks for English (out of 100): 85
Total Marks = 221
Average Marks = 73.67
```
