Self-Made Assignment - C Language

Conditional Statements in C Language

Task:

Write a C program that compares two numbers entered by the user and displays which one is greater, or whether they are equal.

Objective:

1. Ask the user to enter two integers.
2. Use if-else statements to:
 - Display "First number is greater" if the first number is larger.
 - Display "Second number is greater" if the second number is larger.
 - Display "Both numbers are equal" if they are the same.
3. Display the result clearly.

Output Screen:

Output

```
Enter first number: 45  
Enter second number: 32  
First number is greater.
```
