Self-Made Assignment - C Language

Operators in C Language

Arithmetic Operators in C

Question:

Write a C program that:

1. Asks the user to enter **two numbers** (integers).
2. Then, the program should do the following:
 - o Add the two numbers
 - o Subtract the second number from the first
 - o Multiply the two numbers
 - o Divide the first number by the second
 - o Find the remainder when the first number is divided by the second
3. Show (print) the result of each operation.

Output:

```
Output
Enter the first number: 27
Enter the second number: 5

Results of arithmetic operations:
Addition: 32
Subtraction: 22
Multiplication: 135
Division: 5
Modulus: 2
```
