Self-Made Assignment - C Language

String Functions in C Language

Assignment Title: Create Full Name and Email Address Using strcat() in C

What You Need to Do:

You will write a C program that does two simple things:

1. Combine First and Last Name

- Ask the user to enter their **first name** (like "Amit") and **last name** (like "Verma").
- Then, join these two names using the `strcat()` function to make a full name like:

"Amit Verma"

2. Create an Email Address

- Ask the user to enter a **username** (for example: amit.verma).
- Use the `strcat()` function to add "@gmail.com" to the username to create an email like:

amit.verma@gmail.com

Output:

```
Output
Enter First Name: Amrit
Enter Last Name: Singh
Full Name: Amrit Singh

Enter Username: Amrit
Generated Email: Amrit@gmail.com
```
