Self Made Assignment - MS Word

Assignment

Write the following paragraph in MS Word and add Watermark:

Climate Change

Climate change is one of the most serious challenges facing the world today. It refers to significant and long-term changes in the Earth's climate, especially a rise in global temperatures. The main cause of climate change is human activity, such as the burning of fossil fuels, industrial pollution, deforestation, and excessive use of natural resources. These actions increase the concentration of greenhouse gases like carbon dioxide and methane in the atmosphere, trapping heat and causing the planet to warm. This global warming leads to melting glaciers, rising sea levels, unpredictable rainfall, frequent floods, droughts, and other extreme weather events. Climate change also threatens biodiversity and impacts agriculture, health, and water supplies. It affects both developed and developing countries, but the poor are often the hardest hit. To combat climate change, we must reduce emissions, switch to renewable energy, plant more trees, and promote sustainable living practices across the globe.

Instructions:

1. Write the paragraph on **Climate Change** given below.
2. Open MS Word and type the paragraph using the following format:
 - **Font:** Calibri or Times New Roman
 - **Font Size:** 12
 - **Spacing:** 1.5
 - **Alignment:** Justified
3. Add a **relevant image** (see below for suggestion).
4. Insert a **custom watermark**:
 - Go to **Design > Watermark > Custom Watermark > Text Watermark**
 - Type: "Abhyasonline.in"
