Self-Made Assignment - Visual Basic

Control Fundamentals

You have to create this assignment in VB .

A student wants to calculate their average marks in three subjects: Math, English, and Science. Create a VB.NET application that takes input for the three subject marks and displays the average in a message box.

- Create a new Windows Forms App in Visual Studio.
- Place 3 labels, 3 Textbox ,1 Button, and give them appropriate names.
- You have to assign these names to all the controls as given in the table below.

Label 1	Math Marks
Label 2	English Marks
Label 3	Science Marks
Button	Calculate Average
