Ques 1. Write a JavaScript Code that uses a do while loop to keep asking the user to enter a password until they input the correct one.

- Set a predefined correct password, for example: "letmein123".
- Use the prompt() function to get input from the user.
- If the user enters the wrong password, prompt again.
- Once the correct password is entered, display a message like "Access Granted!".

Output  
Access Granted!

Ques 2- Write a JavaScript code that asks the user to enter a positive number. Use a do while loop to keep prompting the user until they enter a number greater than zero (i.e., any positive number like 1, 2, 3, etc.). The program should only stop asking when the user inputs a positive number (greater than 0).

Output  
Enter a positive number: -5  
Enter a positive number: 0  
Enter a positive number: -10  
Enter a positive number: 3  
You entered: 3
