&  
Test Series

Self-Made Assignment - Java Script

History Object in JavaScript

Ques 1:-Create a simple HTML page that demonstrates browser navigation using JavaScript's history object.

Instructions:

- Create an HTML file.
- Add a heading (<h2>) with the text: "Browser History Navigation".
- Create two buttons:
- One labeled "Go Back" that will take the user to the previous page using history.back().
- One labeled "Go Forward" that will move the user forward using history.forward().
- Save and open the HTML file in a browser.
- Visit at least one other webpage (or navigate to this file from another page) so that the Back and Forward buttons have effect.
- Test the buttons by clicking them to go back and forward in the browser's history.

Output

**Browser History Navigation**

Go Back Go Forward
