Inserting Current Date and Time and Slide Number in Power point

26-09-2025

5

Conclusion:

Climate change is one of the biggest challenges facing our planet today. It is mainly driven by human activities and is already causing serious effects like rising temperatures, extreme weather, and threats to ecosystems and human health.

However, it's not too late to act.

By switching to clean energy, protecting forests, reducing waste, and supporting sustainable practices, we can slow down climate change and protect the Earth for future generations.
