Self-Made Assignment - Adobe Photoshop

File Setup & Export in Photoshop

1. Create a New Document with Artboards

- Go to File → New
- Check the box “Artboards” (usually near the bottom of the New Document window)
- Set your dimensions (e.g., 1920×1080 px) and click Create.

2. Add Multiple Artboards

- In the Layers Panel, click the Artboard Tool (or press V and switch from Move Tool to Artboard Tool in the top bar)
- Click the + icons around the existing artboard to add more (as shown in your image: 4 artboards total)

3. Design Each Artboard

- Select each artboard individually and create your designs (e.g., colored rectangles, icons, text).
- Add different background colors and center elements as in the image: Light Blue, Purple, Yellow, and Light Violet backgrounds
- Orange stroke and center circle on each

4. Export as Multi-Page PDF

- Go to File → Export → Artboards to PDF...
- Choose:
  - All Artboards
  - Export Selected Artboards (optional)
- Set file name and location
- Enable “Include Background”

5. Click Run

- Photoshop will compile all artboards into one multi-page PDF, as shown in your diagram.
