Self-Made Assignment - SQL

Keys in SQL

Ques 1- Create a Table with a Foreign Key

Instructions:

- Create a table named orders.
- It should have columns: order_id and student_id.
- Set order_id as the primary key.
- Make student_id a foreign key that references the students table.

Task:

Write a query to create the orders table that references the students table using a foreign key.

ID	student_id	name	age
1	101	Aakash	20
2	102	Bhavna	21
3	103	Chirag	22
4	104	Deepika	23
5	105	Eshan	20
6	106	Farah	21
7	107	Gaurav	22
8	108	Harpreet	23
9	109	Isha	24
10	110	Jatin	25
