Ques1-Write a Python program that asks the user to enter a transaction amount.

- If the amount is positive, print “Income”.
- If the amount is negative, print “Expense”.
- If the amount is zero, print “No Transaction”.

Ques 2-Write a Python program that Ask the user for the car's speed (in km/h).

- If speed  $\leq 60$  → print “Safe Driving.”
- If speed is between 61 and 100 → print “Warning: Drive Carefully.”
- If speed  $> 100$  → print “Overspeeding! Fine Imposed.”
