&  
Test Series

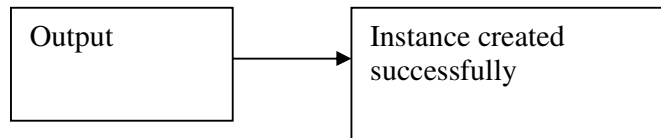

Self-Made Assignment - Python

Pass Statement in Python

Ques 1:-Write a Python program using pass in a Class Definition.

Instructions:

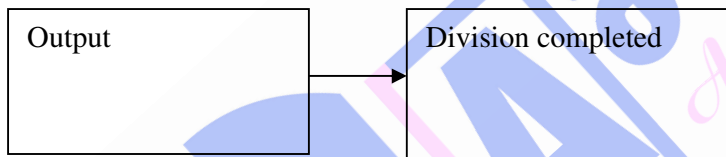

- Create an empty class called MyClass.
- Use the pass statement to make the class syntactically correct.
- Create an instance of the class and print a message.

Ques 2:-Using pass in Exception Handling

Instructions:

- Write a program that divides two numbers.
- Use a try-except block to handle Zero Division Error.
- Use pass in the except block.
- Print "Division completed" after the try-except block.
