Ques 1:-Find the position (index) of a student's name inside the tuple.

Instructions:

1. Create a tuple named students containing five or more student names.
2. Use the .index() method to find the index position of "Kartik". Students =Aarav, Kartik, Neha, Riya, Manav).
3. Display the result using a print() statement.

Output

Index of Kartik: 1

Ques 2:-Combine two tuples of vegetables into one using the + operator.

Instructions:

1. Create two tuples:
2. leafy_vegetables
3. root_vegetables
4. Concatenate them using the + operator.
5. Print the combined tuple.

Output

All vegetables: ('spinach',
'lettuce', 'cabbage', 'carrot',
'potato', 'beetroot')
