Ques 1: Simple Arithmetic Operations

You are given two numbers:

$a = 25$ and $b = 4$

Using these variables, print:

- The sum
- The difference
- The multiplication
- The division (float result)

Use meaningful print statements like:

`print("Sum:", a + b)`

Ques 2: Boolean Comparisons

Given the values:

$a = 18$

$b = 25$

Print the results of:

- $a > b$
- $a == b$
- $a < b$

Each result should be printed with a label like:

`print("a > b:", a > b)`
