Self Made Assignment - Python

Accessing Attribute, Constructor and Destructors in Python

Ques: 1 Write a Python program to demonstrate the use of a constructor and a destructor using a Car class.

Instruction (step by step)

- Create a class named Car.
- Use `__init__` to display a creation message.
- Use `__del__` to display a deletion message.
- Create and delete an object.

Ques: 2 Write a Python program to create a Teacher class with name and subject. Use a constructor to store values, a function to display them, and a destructor to remove the object.

Instruction (step by step)

- Create a class named Teacher.
- Use `__init__` to store name and subject.
- Create a `show()` function to display data.
- Use `__del__` to show deletion message.
- Create and delete an object.
