Ques: 1 Write a Python program to create a Student class that inherits the Person class and adds a roll number.

Instruction (step by step)

- Create a class named Person.
- Use a constructor to store name and age.
- Create a class Student that inherits Person.
- Add roll number in Student class.
- Create a function to display all details.
- Create an object and show the output.

Ques: 2 Write a Python program to demonstrate inheritance using Animal and Dog classes.

Instruction (step by step)

- Create a class named Animal.
- Add a function sound().
- Create a class Dog that inherits Animal.
- Add a function bark().
- Create an object and call both functions.
