Self Made Assignment - DHTML

Margins and Padding in CSS

Ques: 1 Write a CSS program to shows how to give different padding values for each side.

Instruction (step by step)

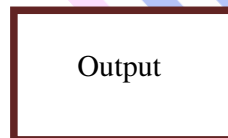

- Create a box (div element).
- Give different padding values for top, right, bottom, and left sides.
- Observe how the content moves away from the edges of the box.

Ques: 2 Write an CSS program to create two boxes placed side by side. Use CSS margin to create space between the boxes.

Instruction (step by step)

- Create two boxes side by side.
- Use margin to create space between them.
- Observe how changing the margin changes the space.
