Ques: 1 Write a python program to create a simple class using Encapsulation.

Instruction (step by step)

- Create a class Student.
- Store the student name(Rahul) as a private variable.
- Create a function to display the name.

Ques: 2 Write a Python program to store user password securely using Encapsulation.

Instruction (step by step)

- Create class User.
- Make \_\_password private.
- Create setPassword() method.
- Create showPassword() method.
