Exam Paper for Html Basics

Ques10: Explain how the <hr> tag affects the layout of a web page. Write an example of using <hr> with the width and color attributes.

Section C(1*20=20)
Long Questions

Ques 11:-You have to write the code for this output? (20Marks)

Welcome to HTML Basics

1. About HTML

HTML stands for **HyperText Markup Language**. It is used to create the structure of web pages. HTML uses various *tags* to define elements such as headings, paragraphs, images, and links.

2. Paragraph Tag Example

This is an example of a paragraph tag in HTML.
You can write multiple sentences, and HTML will automatically handle text wrapping.
If you want to break a line manually, use the **
** tag as shown above.

3. Font Tag Example

This text uses the **** tag to change its color, font style, and size.
Blue colored text
Red smaller text
