

Q5. In the figure  $AB \parallel EF$.

Ans. ~~Not, $AB \parallel EF$~~ AB Not Parallel to EF .

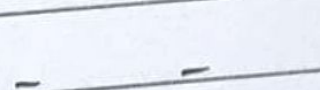

Q7. Find the  figure?

Ans. $5x + 37 + 43 = 180$ [Supplementary Angle]

$$5x = 180 - 80$$

$$5x = 100$$

$$x = 20$$

10. In the  $\angle BCO$?

Ans. $\angle ABC = 120^\circ$ ~~$\angle COP = 140^\circ$~~ ~~$\angle BCO =$~~

$$\angle COP = 140^\circ$$

$$120^\circ + \angle BCO = x$$

$$x = 120^\circ + 140^\circ$$

$$x = 260^\circ$$

So, $\angle BCO = 260^\circ$
