

Q.1 Power supply →
Mother board →

Ans → Power supply - है computer CPU

की main part है जो मदद करता है Power supply
CPU को काम करने में मदद करता है।
Generate heat को हटाने में मदद करता है।
Computer में work करने में मदद करता है।

Mother board → है computer की मदद

करती है जो CPU में जोड़ा जाता है।
सभी main part को जोड़ती है।
इसके बिना computer काम नहीं कर पाता।
Mother board में ही RAM लगाया जाता है।
Processor भी Mother Board को जोड़ा जाता है।

2. System Software

है computer में जिसकी मदद से computer काम करता है।
Computer को काम करने में मदद करता है।
जो भी काम करना है उसे binary में बदल देता है।
Command भाषा में काम करता है।
System Software को ही हम OS कहते हैं।
जो वही काम करता है।

3. different between application Software and System Software

Ans

A Computer Software is a collection of instructions that tell a computer how to perform a task. It is divided into two main categories: System Software and Application Software. System Software includes the operating system, device drivers, and utility programs. Application Software includes programs like Microsoft Office, web browsers (Chrome, Mozilla), and social media apps. Application software is designed to help users perform specific tasks, while system software manages the computer's hardware and provides a platform for other software to run.

→

System Software is the software that manages the computer's hardware and provides a platform for other software to run. It includes the operating system, device drivers, and utility programs. Application Software is designed to help users perform specific tasks, such as word processing, web browsing, and social media. Examples of application software include Microsoft Office, Google Chrome, and WhatsApp.

4

output devices

Ans

Computer output devices are hardware components that convert digital data into a form that can be perceived by humans. They include monitors, printers, speakers, and headphones. Monitors display visual information, printers produce physical documents, and speakers and headphones provide audio output. These devices are essential for interacting with and using a computer system.
