1. Ans: Differentiation between microphone and web camera:-

Microphone	web - Camera
(i) Its use for audio input in Computer system	(i) Its use for video Input in Computer System.
(ii) Microphone is a input device.	(ii) web - Camera is an Input device.
(iii) Microphone is useful for calling and gaming	(iii) web - Camera is use for video calling and click photos.

2. Ans: Light Pen:- Light pen is input device because its use for Data input in Computer System. help of light pen we can touch Computer screen and scrolling and open the application. Its very useful when we make drawing and pictures.

3. Ans: Plotter is Data input device for a Computer System. Its use for Data Input in Computer. Its make Do some Graphics.

## Types of Plotters:-

- (i) Lighting plotter,
- (ii) Dot matrix plotter.

4. Q. An Impact Printer :- Impact Printer is a type of printer which can be used for data output on hard paper. Technology used in impact printer is ink print with the help of needle. It helps to copy data and give output on a paper sheet.

## Types of Impact Printer.

- (i) Dot matrix printer.
- (ii) needle printer.
- (iii) needle dot matrix.

5. Q. An Input Unit :- Input unit is most important unit in computer system. which we can use for data input in computer system. Input device helps us to input our data in computer system. and after input processing unit produces the data and give output with help of output devices. There are three types of input devices.

(ii) Key board :- Key board is use As a Input device. we put numerical or Alphabet Data in Computer with help of Key board.

(iii) Mouse :- Mouse is also a input Device which help to select items on Application in computer System.

(iii) Joy stick :- joy stick is also a Input device which can we used for playing video games in our Computer System.
