Name → David Kumar
Father name → Vinod Kumar

Course → DCS+
Teacher → Diksha mam

Ques → 1 What is Input Device? Explain any three input device?

Ans → In computing, an input device is a piece of equipment used to provide data and control signal to an information processing system, such as computer or information appliance.
⇒ Example of input unit → Key Keyboard, Mouse, Scanner, microphone.

Ques → 2 Which technology is used in impact printer? Give three types of impact printer?

Ans → Some of largest printer vendors continue to manufacture, market, and support impact printers, parts and supplies. Impact printers are most functional in specialized environments where low-cost printing is essential. The three most common forms of impact printer are → dot matrix, Daisy-wheel, and line printer.

Ques → 3 What is light pen? why it is considered as input device?

Ans → A light pen is light-sensitive pointing input device commonly used

to select or otherwise modify text or data on a screen. Used with a CRT monitor, these devices were an early form of manipulating and highlighting data on the screen.

- 4 What do you mean by platter?
and explain its type with example?
- Platters are designed in different forms, and they use different - different tools to draw line on the paper. For example, a 3D platter (cutting platter) uses knives to design any type of diagram or cut out a piece of material on the basis of given inputs from the computer.
