Q.1. Input Unit

Input unit :- An input devices provides an interface between the users and the machine such as keyboard and mouse which enable to control the functions of a computer. They provide a method to access files and folders and to enter data.

Explain any input devices

(i) Keyboard - Keyboard की मदद से हम text type कर सकते हैं।

(ii) Mouse - Mouse की मदद से हम application को click कर सकते हैं।

(iii) Speaker - Speaker की मदद से हम application की voice को record कर सकते हैं।

Q.2. Light Pen
Light pen की मदद से हम application में text को highlight कर सकते हैं।

Q.1. Microphone

Most laptops have a built-in microphone which should work fine.

Web Camera

Most laptops have a built-in webcam that will work fine. External webcams may be used.

Q.3 Plotter - Plotter is a printer that interfaces commands from a computer to make line drawings on paper with one or more automated pens.

Types

i) Drum Plotters

The drum plotter is a specialized output device whose name indicates its function. This device works by moving a pen on a single axis track while the paper moves on a cylindrical drum.

ii) Flat Bed Plotters

Flatbed Plotters are output devices whose name also hints at their function.
