

Name -> Harsh, Father name - Bharat, course - CCCBA, class 10

Product Name	Quantity	Product Name	Quantity
--------------	----------	--------------	----------

(1) (i) RAM -> ~~Random~~ RAM is a Random Access Memory. It is a computer primary memory.
Need to explain correctly.

(ii) ROM -> ROM is a Read Only Memory. It is a computer secondary memory.

(3) ~~The~~ ^{Two} Types of memory are -

(i) Volatile memory -> It is computer primary memory. It is main memory of computer. It is store ~~the~~ data in computer and it is ~~not~~ store data by itself.
more elaboration required

(ii) Non-volatile memory -> It is computer secondary memory. It is store data into computer very fast and this memory data is very secure.

(4) Primary memory

Secondary memory

(i) It is a semiconductor memory.

(ii) It is a ^{type of} magnetic and optical memory.

Product Name

Quantity

(ii) It is character of volatile memory.

(iii) It contains program and data currently being used to microprocessor.

(iv) It is also known as ~~main~~ main memory.

Q5) Computer Memory is main memory of computer. It is store data into computer. It is volatile memory and it is work very slow and. ~~it is~~ computer on work and this time current out so ~~data~~ data is ~~every~~ every. ~~is~~ waste.

1/2

Product Name

Quantity

i. It is non volatile.

Not attempted in detail.

ii. It is used to Bulk Storage.

iii. It is also known as Backup memory.

Not attempted in detail.
