

(Erasable programmable Read only Memory), and EEPROM (Electronic Erasable programmable Read only memory), and EEPROM is also know a Cache Memory.

All Concepts clear

PROM

1) PROM is Programmable Read only memory ~~error~~ yield Programmable memory (EPROM) or one-time non-volatile memory (OT-NVM) is also known. From PROM is ~~also~~ used to write a content. But the content is permanently, because the content is not erased. PROM is not erased the content.
