Q1

SASD

1. Magnetic tapes are the part of SASD

2. SASD follow a sequence in storage device

DASD

1. Magnetic disks and optical disks are the part of DASD

2. DASD follow a direct route to access storage device

Q2

(1) hard disk are non volatile in nature

(2) when the device turned off it retains the data

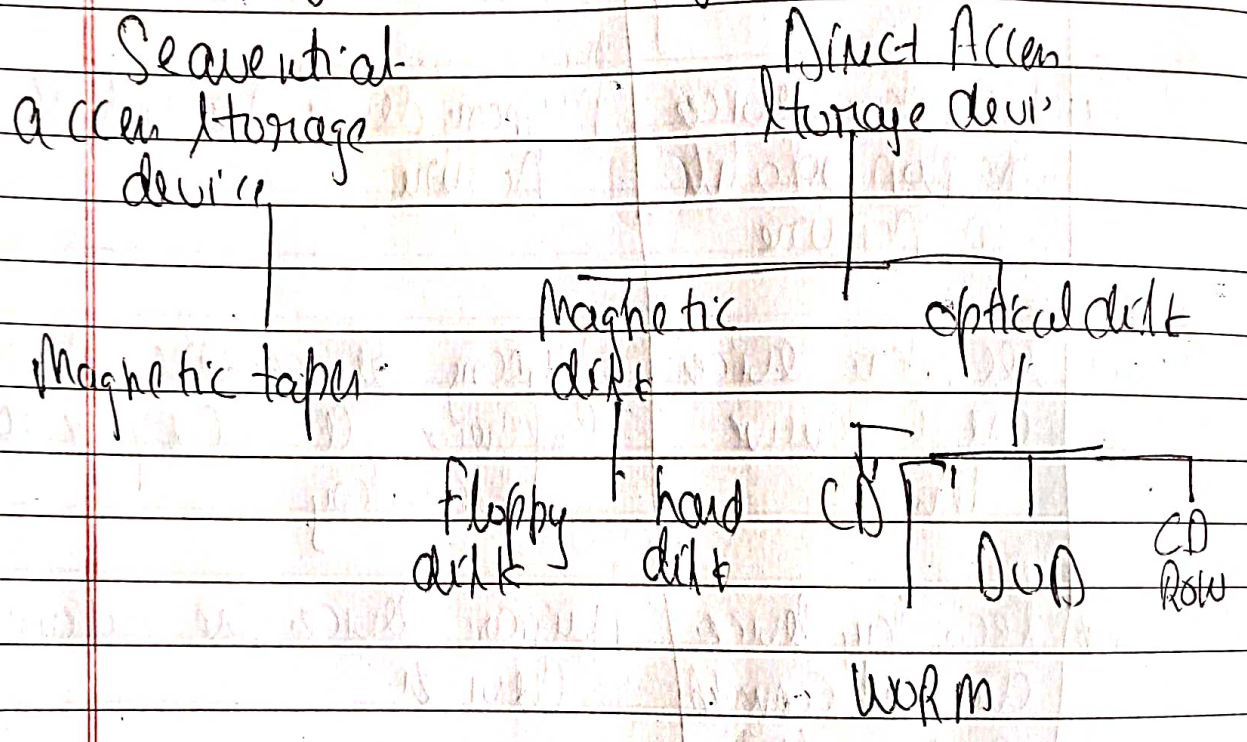

(3) hard disk ~~are~~ are ~~an~~ are an important secondary storage devices

Q3/

Secondary memory is fast & non-volatile in nature. It is less expensive. It retains the data of the computer when device turned off.

- (i) Secondary devices are non-volatile
- (ii) less expensive
- (iii) Better than primary devices.

types of secondary devices

Q4/ Fixed storage devices are not fixed they can be removed in case of maintenance & service. Fixed storage devices are non-volatile storage devices.

Removable Storage: - Removable Storage devices can be removed any time when the need arises

Q5

	Secondary Storage	Primary Storage
Fact	Secondary Storage is fact as compare to Primary	They are slow as compare to Secondary device
Volatility	Secondary devices are non volatile in nature	Primary devices are volatile in nature
Expense	Secondary devices are expensive	Primary devices are more expensive as compare to secondary
Installation	Secondary devices are hard connected externally to the computer	Primary devices are internal devices.
