Mohit Father Name:- Rakesh Kumar
Class Teacher:- Monika miam, Roll no:- 1507
Login- 8708342496

1. Ans:- Computer is an Electronic device.
It is use to get output on our
Data and information. Computer is
used in govt, on financial sectors.
Computer gets raw data and It
Process on this data after that
give output information

2. Ans Diligence:- Computer is Diligence device.
It can do work many
hours without any attention or
weakness

(iii) Versatillity:- Computer Can do many
work at the same
time. In Computer. we get
output on our data very fast.

3. Ans:- Charles babbage is the father of
computer. Because It make
computer formation. in the way
which can do many multiplication
at same time. and after
8 digit It invent 10 Digitian
number of computer. it also
like human desimal. information.

Q. Answer: Multitasking:- In computer we can do many works at same time. And we get our output very fast. we can work on ms word and play songs and video at same time. It is multitasking.

(ii) No IQ:- Computer have no IQ. It cannot do any work with his own mind. When we give instruction on computer system. It can give output our data.

(iii) speed:- Computer is very fast machine. who can do many works at same time without any stress or weakness. It give output very fast as compare other machines.

S. Answer: (i) Storing data: Computer is best option to store our data and information in safe way. It cannot make any harm to our data.

(ii) Multitasking:- Computer can do many works at same time. we can work on one application and we can working other application at same time.

(iii) Versatility: - Computer can do many works at same time without any stress and weakness. Computer cannot ask any complaint regarding his task.

(iv) Speed: - Computer is very fast device. It can do many tasks at same time in very fast way.

(v) Accurate: Speed in makes very fast computer. Computer can give accurate data on his output information.
