Father's Name - Sh. Bhagwan Dass

What is Computer

Computer is an electronic machine. That can store all information, calculate amount and control other machine. It is derived by "Latin" language "comput.".

Diligence → Computer can perform all task without getting tired.

Versatility → Ability of computer to perform various tasks at one time simple as well as complex. It is multi tasking.

Charles Babbage is a father of computer. Because it calculate various tasks. he research the machine.

Babbage's Difference Engine Number 1 was the first device ever devised that could calculate and print mathematical tables.

Q. Three characteristics of computer.

- i) Accuracy
- ii) Diligence
- iii) Zero I.Q

Explanation

1. Computer is accurate. Computer perform calculations with 100% accuracy. Errors may occur due to data inconsistency or inaccuracy.

2. Diligence -> Computer can perform all task without getting tired.

3. Zero Computer has no I.Q level as a human being. It is passive factor. It is controlled by a human being.

Q. Characteristic

- | | | | |
|---|----------------|---|-------------|
| 1 | Accuracy | 5 | Speed |
| 2 | Diligence | 6 | Memory |
| 3 | Versatility | 7 | Storage |
| 4 | Zero I.Q level | 8 | No Feelings |
