- Q1) Explain the following characteristics of computer
(i) Diligence (ii) versatility - (2)
- Q2) Mention any three characteristics of computer. In detail - (3)
- Q3) Give any difference b/w speed & accuracy in term of computer. - (3)
- Q4) Give any three reason why computers are becoming important in today's life. - (3)
- Q5) Explain basic function of computer.

Answers

Ans 2) Three characteristics of computer are:-

- 1) Speed - The speed of computer is very fast. When you will input into the computer then within seconds you will get the output
dumb
- 2) NO IQ - Computer is a machine. It can not perform any task until or unless any human will not give any input.
- 3) No feeling - Computer does not have any emotions. It is a simple machine which gives us output. It does our work without any selfishness & tiredness.

Ans 3) Speed - The speed of computer is very high. It gives us result within seconds.

Accuracy - The accuracy of computer is very high. It perform every calculation with accuracy.

Ans 4) Three reasons computer are becoming important in today's life.

1) With the help of computer we can perform any calculation & we can make presentations for the office work or any other institution.

2) We can take laptop which is also a type of computer from one place to another & do our work there.

3) It gives us accurate results as it's accuracy is very high.

Ans 5) Basic functions of computer.

1) Input = It is a raw information we give to computer with the help of input devices.

2) Processing = It processes the raw information & convert it into the meaningful information.

3) Output = Output is also called 'result'. The input we put then it will give output to us after processing the information.

4) Storage = we can store our data & information with the help of this. we can store as much information as you want.

Ans 1) Diligence = A computer can work without any for hours without creating any error. As it's accuracy is very high. Due to its ~~accuracy~~ capability it overpowers the humans.

Versatility = Computer is a versatile. It means you capacity to perform completely different types of work. You may use your computer to perform different tasks.
