

Q1

- 1 Diligence ⇒
 A computer can perform millions of tasks or calculations with the same consistency and accuracy.
- 2 Versatility ⇒
 The capacity of the computer of performing more than one task at the same time.

Q2

- 1 Speed ⇒
 A computer works with much higher speed and accuracy compared to humans while performing mathematical calculations.
- 2 Accuracy ⇒
 Computer perform calculations with 100% accuracy. Errors may occur due to data inconsistency or inaccuracy.
- 3 Memory ⇒
 A computer has built-in memory called primary memory where it stores data.

Q3

Basic	Speed	accuracy
1 <u>Meaning</u>	speed refers to performing a give task to take less time.	accuracy refers to performing a given task with more accuracy.
2 <u>Main focus</u>	Main focus of speed to perform task must faster. No matter errors are occur or not.	Main focus of accuracy is to perform task with No errors.

1. Chance to get error.

There are more chances to get error.

There are less chance to get error.

P4

1. Computer make life easier =>

Computer make life easier not only for adults but as well as kids also. They can use computers to type reports, prepare presentation, complete homeworks and assignment and even make their own lesson plans.

2. Computer help in online communication =>

Communication is easier than ever thanks to computers people all over the world are able to keep in touch with their loved ones.

3. Computer offers endless resources for Education =>

Computer are extremely beneficial when it comes in education. That is why almost every school has computer lab where children can take advantage of this ~~king~~ kind of technology.
