04

Expansion cards =>

Expansion cards refers to the Expanding storage and the Ram ~~on the~~ it was used to Expand storage it is instore on the the mother board on the mother there are slots that used to Expansion card

(2)

CPU

CPU (Center processing unit) CPU is a brain of computer it's perform of the task without CPU computer is nothing

06

(1/2)

Bar code reader =>

Bar code reader are used to read bar in like when you scan the bar code you know about the thing which you scan

the output

Q7 CPU (Central processing unit) is the Brain of computer it instead to perform the input and output tasks. Given the instruction to the other device to perform the tasks.

2

Q8 Arithmetic and logic unit -> Logic unit

1

Logic unit perform the ~~allocation~~ work to perform the calculations on the computer. Arithmetic and

Q9 Control unit ->

Control unit perform the work like input tasks or output tasks like it take input by the user and provide the output on the monitor or the other output devices.

Memory measurement ->

Computer has a type of memory = RAM, ROM, peripheral. The two memory RAM, ROM was give in the CPU you can expand it.

the memory by b periods or other
accepted dates.
