Ques(2) Solid State Storage :- Solid State Storage is a type of storage technique that employs storage devices built using Silicon microchips based architecture. (Include memory cards).

Ques(1) which is volatile

Ans:- RAM (RANDOM Access Memory) is a volatile memory because it is a temporary memory. When a power is off Random Access Memory lost the data.

Ques(4) Difference :-

RAM

ROM

* RAM stands for 'Random Access Memory'

* ROM stands for 'Read only memory'

* RAM is a volatile memory

* ROM is a non-volatile memory.

* RAM is expensive compared to ROM.

* ROM is cheaper memory compared to RAM.

* RAM is loss the data when a power is off.

* ROM do not loss the data because it is a permanent memory

Ques 6 Function of Pendrive

Ans:- Pendrive also known as flash drive, Pendrive can perform the function i.e. Data Storage.

- * Pendrive is a Data Storage Device. Flash drives are typically removable, & rewritable.
- * Pendrive is small size device as compared to floppy disk. It is easy to use.
- * Pendrive small medium to transfer and store the information from the computer.

Ques 8 Define :-

(2) Optical Storage :- An optical disc storage medium designed to store - captures the data normally in DVD format.

(3) Solid State Storage :- Solid state storage is a type of storage technique that employ storage devices built using silicon microchips based architectures include memory card, flash drive, etc.

(1) Magnetic Storage :- Magnetic storage device is device that can perform a function. It can store the data of magnetic devices.

Ques 7 What is the primary function of Hard Disk Drive?

Ans:- The primary function of Hard Disk Drive is:-

- * Hard disk drive is a device that defines Intel internal device.
- * Hard disk is same as floppy disk. Both disks are similar.
- * Hard

Ques 9 Floppy Disk:-

* Floppy disk is a disk. It is device that can used to store data.

- * Floppy Disk is a round shape and small size device.
- * Floppy Disk can store the data ~~long~~ long term used.
- * Floppy Disk can manage the storage of the memory and store bulk of data.
- * Floppy disk define just like Hard Disk and other disks.

Ques 10 True/False :-

- (1)
- (2)
- (3)

Ques 5 Match the following :-

(i)
